Hello Rory,

Sorry I was out of town for your questions last week. Lisa said she sent you the document and you noticed an error in Enclosure 1 where it should say sediment TMDL written, not nutrient.

Did you find anything else that needs correcting or have any unanswered questions?

Sounds like you guys are getting some snow down in Denver. Hope it's back to spring-like weather for you soon.

Hi Peter,

Vern sent me the Approval letter and Enclosures 1 & 2, but I'd also like to have a copy of the TMDL document before I start entering it into NTTS. Would you please send me a copy?

Thanks!

**Rory**
